

**WORLDWIDE RECOGNISED  
HOLMEN PELLET DURABILITY  
TESTING**

**HOLMEN®**  
strength in pellet durability

The Holmen range of Pellet Testers provide a versatile means of Durability Testing for animal feed pellets, wood pellets and many other types of pellets. The Holmen range consists of 4 models.

**HOLMEN® NHP100**  
**Suitable for Animal Feed Pellets**

The Holmen NHP100 portable Pellet Durability Tester is our entry level machine. It can be easily transported around different testing locations requiring only to be placed on a flat stable surface to provide spot checks.

The NHP100 operates by loading a manual weighed sample of pellets into the test chamber which cascades them in an air stream causing the pellets to collide with each other and the perforated hard surfaces of the test chamber.

After the test cycle the pellets are manually removed and weighed to obtain a 'Pellet Durability Index' (PDI).

**WORLDWIDE RECOGNISED  
HOLMEN PELLET DURABILITY  
TESTING**

**HOLMEN®**  
strength in pellet durability

**Results obtained up to 4 times  
quicker than the tumbling can!**

Simulates the pellets transportation environment from mill to trough.

Provides the ability to manually calculate the 'Pellet Durability Index' (PDI).

Versatile and portable to enable transportation around different testing locations.

Fast and Simple operation.

30, 60, 90 and 120 Second timer test function.

Fines and dust are removed during the testing sequence.

Fitted with standard 2.5mm diameter Perforated Hopper.

Optional extra sizes of Perforated Hoppers.

**SPECIFICATIONS**

**Electricity Supply :** 115V / 230V, 50/60Hz

**Pressure :** 'PDI' Cycle 70 mBar

**Size (LxWxH) mm :** 440 x 300 x 440

**Weight :** 17.5 kg
